

## Driver Tree Tool User and Admin Manual

## Table Of Contents

# Overview

## Welcome Page

The Welcome Page is the landing page for entry into the Driver Tree Tool. The Welcome Page contains four main features:

1. Login
2. Request Account
3. Forgot Password or Username
4. Administrator's Login

It is the only way to enter the tool and the only route that isn't protected by the withAuth

check.

## Login

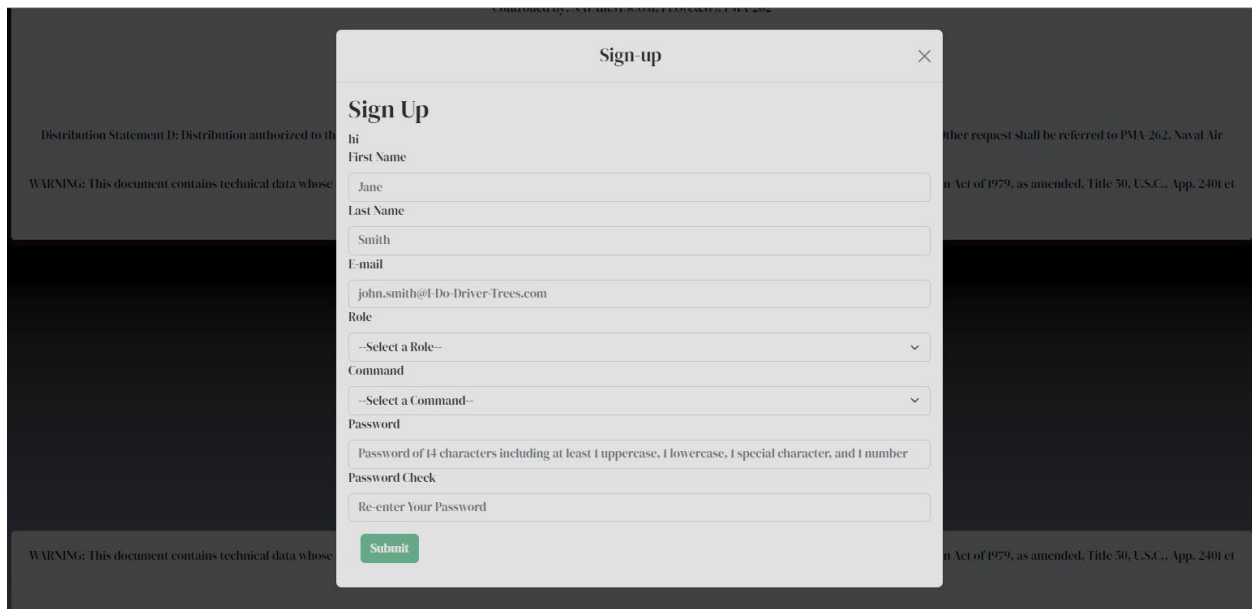

The Login button is disabled until the user enters a user name and password. The username is the email that the user entered when they create their account. The tool uses a regex to validate that an email was provided prior to enabling the login button. Upon a

successful login, the tool will save a json webtoken to the user's local storage to validate all HTTPS requests.

## Request Account

The Request Account button opens a user dialogue screen to enable a new user to request an account. Once the user has entered all of their information and selected a desired Role and Command the Submit Button becomes enabled. The Sign-up Dialogue requires a minimum 14 digit password with 1 uppercase, 1 lowercase, 1 number, and 1 special character before it will accept a Password and provides a password check feature.

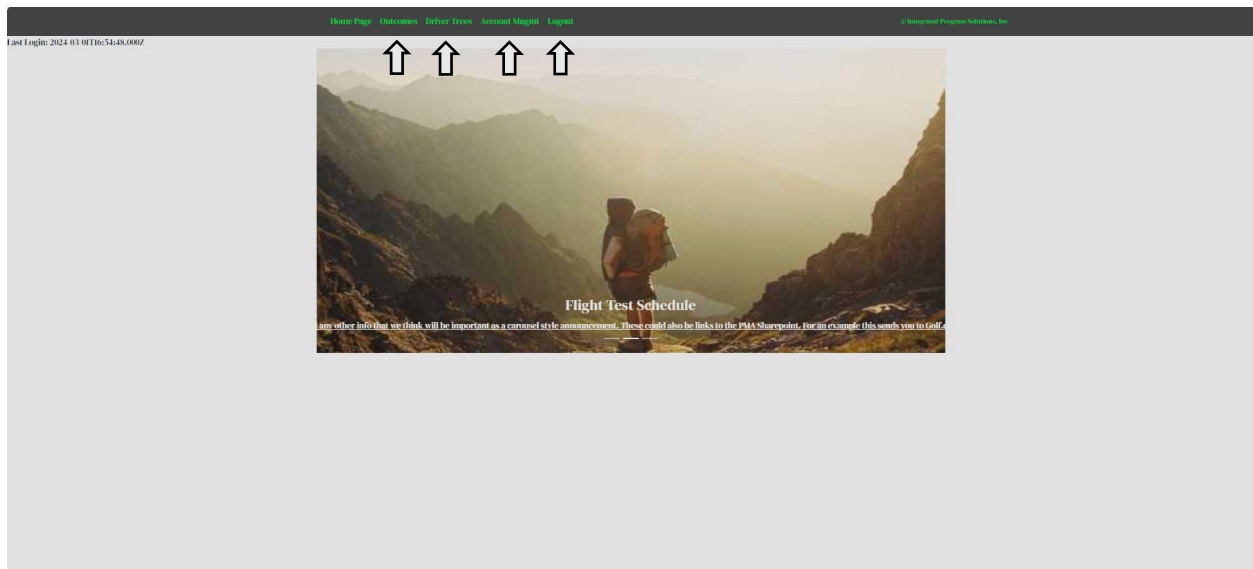

*Figure 2: Request Account Dialogue*

The image shows a 'Sign-up' dialogue box with a close button (X) in the top right corner. The title 'Sign Up' is at the top. Below it, the text 'hi' is followed by a 'First Name' field containing 'Jane'. The 'Last Name' field contains 'Smith'. The 'E-mail' field contains 'john.smith@I-Do-Driver-Trees.com'. There are two dropdown menus: 'Role' with the text '--Select a Role--' and 'Command' with the text '--Select a Command--'. Below these is a 'Password' field with a hint: 'Password of 14 characters including at least 1 uppercase, 1 lowercase, 1 special character, and 1 number'. A 'Password Check' section follows, with a 'Re-enter Your Password' field. At the bottom is a green 'Submit' button. The background is dark and shows parts of a document with technical data warnings.

## Forgot Password / Username

The Forgot Password dialogue will send an email using the user's default email client (e.g. Outlook, gmail, etc.) to the User's Driver Tree Coordinators to allow the Coordinator to reset the user's password.

## User's Home Page

This is the land spot for all user's after they log in. The carousel is managed by the Admin on the [Administrator's Carousel Management Page](#). User can opt to enter in the overall [Outcomes Page](#) which will list all of the Outcomes that user has access to, the [Driver Tree Page](#) which lists all of the Driver Trees the user has access, or go to their [Account Management Page](#) to update their specific user information. The user will be automatically forwarded to the [Account Management Page](#) if their password has expired.
